

RIASORB®

SUSPENSION TECHNOLOGY

Protected by global patents and trademark registrations, the RIASORB® suspension system delivers a tailored, active and controlled reaction in direct proportion to the speed and force of any impact.

Key benefits:

- greater versatility and efficiency than alternative technologies
- prevents dangerous or catastrophic failure of equipment (controlled impact time curve)
- lightweight with superior strength
- lubrication and maintenance free
- able to operate in extreme temperature conditions
- significantly reduces vibration noise

PATENTED TECHNOLOGY APPLICATIONS

- Automotive, Marine and Rail
- Cycling
- Medical
- Aviation and Aerospace
- Construction and Engineering
- Military and Law Enforcement
- Strollers and Wheelchairs
- Trolley Suspension and Steering Systems
- Footwear
- Playground and Exercise Equipment
- Battery Impact Protection
- Specialised Suspension Requirements
- Safety Equipment
- Furniture
- Impact Absorption
